

SUPPORTING ACADEMIC HONESTY AT TKIS

“Academic honesty must be seen as a set of values and skills that promote personal integrity and good practice in teaching, learning and assessment. It is influenced and shaped by a variety of factors including peer pressure, culture, parental expectations, role modelling and taught skills.” International Baccalaureate, 2009 “Academic Honesty” IBO, Cardiff.

At TKIS, academic honesty supports the academic and ethical development of students and equips them for future academic and professional lives.

TKIS is committed to academic honesty and will ensure that all students in the IB Diploma Programme are aware of what this entails. While we trust that all students enrolled in the school will submit work of their own that is appropriately referenced, we feel that it is necessary to give guidelines as to what this means and what the consequences will be if any work does not meet this standard.

Basic strategies

- Modelling appropriate referencing in handouts and class materials
- Familiarity with the individual writing styles of students
- Clear guidelines about types of misconduct and consequences
- Formative assessment tasks which require summarising, paraphrasing and referencing
- Drafting process and meeting deadlines
- Resources are available on TKIS website, for student and parent use.

Academic Dishonesty and Malpractice

Although the following list is not exhaustive, academic dishonesty can, in general, take several forms:

plagiarism: taking work, words, ideas, pictures, information or anything that has been produced by someone else and submitting it for assessment as one’s own.

copying: taking work of another student, with or without his or her knowledge and submitting it as one’s own.

exam cheating: communicating with another candidate in an exam, bringing unauthorised material into an exam room, or consulting such material during an exam in order to gain an unfair advantage.

duplication: submitting work that is substantially the same for assessment in different courses is not allowed.

falsifying data: creating or altering data which have not been collected in an appropriate way.

collusion: helping another student to be academically dishonest.

Prevention of Academic Dishonesty

TKIS, in line with IB recommendations and practice, may submit random or selected pieces of work to external bodies for verification and evaluation of sources. Students should be able to submit electronic copies of any work to either the teacher or the relevant curriculum co-ordinator for such verification at any time. It is recommended that students keep all rough notes and drafts that they produce in preparing work for submission to teachers or examiners in order to be able to defend themselves against charges of malpractice.

All students must sign an authentication document, for pieces that are uploaded to the BI for assessment – EE, TOK, WA, WT, IA, Art works. This will be filed for future reference, if required.

Procedure for Investigating Suspected Cases of Academic Dishonesty

If a teacher, or another member of staff, suspects that a student may have breached the school's standards of academic honesty, he or she will inform the IB DP Co-ordinator. The latter will investigate the matter, and will inform the student of the concerns of the teacher, giving the student the chance to reply to the accusations. If it can be shown that inappropriate work has been submitted, the IB DP Co-ordinator will make a recommendation to the Principal as to whether or not the case is one of academic dishonesty, or of an academic infringement. Again in line with the IB's policy and practice, the determining difference between these two possibilities will be one of intent. The Principal will decide the outcome of the case.

The Consequences of Academic Dishonesty

Any student who has found to be academically dishonest in any of the above ways, or otherwise, will have a record of this put into his or her student file, and this will be communicated to the student's parents. If the work has been submitted as an official piece of IB coursework, it will not be accepted; if there is time for him or her to do so, the student will be allowed to resubmit another piece of work in its place. If there is not time for the student to produce new work, he or she will normally not receive a grade for that course and will therefore not receive an IB Diploma. A second violation will result in the student being removed from that particular IB DP course, and his or her being disallowed from being able to take an IB certificate in that subject. In addition the student will not receive credit towards the high school Diploma for the course. If a student submits work to the IB which is later recognised as having been produced dishonestly, the IB will not award a Diploma to the student.

Students should recognise that they are ultimately responsible for their own work and that the consequences of any breaches of the standard of academic honesty will be theirs alone. They should speak to teachers regularly about their work and show drafts of it at various stages in the production process. They should ask teachers for advice if they are at any time unsure of what they have done in relation to referencing sources.

FOR TEACHERS:

Published resources

Armstrong, Tricia 2009 *“Information transformation: teaching learning strategies for research, projects and activities”* User Friendly Resources, Mascot, NSW.

Photocopiable masters for classroom activities including – recording resources; web site evaluation; fact and opinion; primary and secondary source checklist; using print resources; how to write a bibliography.

Koechlin, Carol and Zwaan Sandi 2002 *“The information toolkit: tasks, framework and strategies for managing information in the classroom: Book A”* User Friendly Resources, Annadale, NSW.

Photocopiable masters for classroom activities including – How can we identify key points?; What do we need to know about digital information? Is this fact or opinion?

Koechlin, Carol and Zwaan Sandi 2002 *“The information toolkit: tasks, framework and strategies for managing information in the classroom: Book B”* User Friendly Resources, Annadale, NSW.

Photocopiable masters for classroom activities including – Key characteristics of webquests; What's the best way to synthesis findings?; Glossary of terms for information tasks.

In-house resources

“Whose work is this? Ensuring academic honesty in the IB Programme”

Short Powerpoint presentation originally prepared for a year 10 seminar covering the main points of the importance of academic honesty and types of malpractice.

“Using sources in essays”

Graphic organisers which can be used as class handouts or Powerpoint slides.

“Webquest: Malpractice – what it is and how to avoid it!”

This Webquest asks students to visit 4 Australian University websites and record university definitions and advice about referencing and plagiarism.

“Harvard referencing and paraphrasing assignment”

This assignment requires students to practice paraphrasing, direct quotes and referencing and provides an example to follow. It uses sources suitable for Theory of Knowledge students.
