

Innovation Scholarship

Application Form

Year 5 to Year 10 in 2021

The Innovation Scholarship allows students to demonstrate creative thinking that leads to an innovative (marketable and unique) conclusion (product).

To assist applicants in the development of their thinking we define innovation as the “melding of two, or more, previously unrelated items to create a unique and useful item”. Applicants are required to draw on their interest/passion in two distinct areas (e.g. Cycling and Chess) to create a new item that could serve a genuine purpose (rather than pure fantasy – i.e. a cycling chess piece!).

Applicants are not expected to physically produce such an item, but are expected to present their thought processes/line of thinking in developing this new item. This presentation could take the form of an essay, a movie, a poster, audiovisual presentation, a song, painting, etc. The submission format is not crucial as the interview panel is more interested in the applicant being able to explain their thinking (success and errors) and the reasons they have followed a particular path.

The Innovation Scholarship process:

1. Submit the Innovation Scholarship Application Form, along with payment for the entrance assessment by close of business on Wednesday, 26 August 2020.
2. Your child will sit The Kilmore International School entrance assessment on Saturday, 29 August 2020. Further details will be provided upon receipt of your application.
3. An Innovation Scholarship presentation session will be scheduled in early September.
4. An offer will be made in writing, by the Principal by the end of September.
